¿Por qué Publons?

La Web of Science fue pionera con la creación de **ResearcherID** y la atribución de un único identificador para los autores.

2007

La Web of Science apoyó **ORCiD** desde su inicio. El concepto, el código y una parte de la financiación provinieron de ResearcherID.

2012

2013

2019

Los datos de ResearcherID migraron hacia Publons. Web of Science Group está invirtiendo en Publons para desarrollar una plataforma completa con los perfiles de los investigadores, que además se integrará con las demás soluciones de la Web of Science.

Publons fue la primera plataforma ofreciendo un servicio gratuito a los investigadores para hacer visible sus trabajos editoriales y de revisión por pares. Publons hace parte del grupo Web of Science desde 2017.

Evolución en identificadores de autor y perfiles

Una experiencia única para identificadores de autor únicos.

Web of Science y Publons tienen un número de identificación único.

Web of Science ResearcherID vincula los datos desambiguados a través de los sistemas en una relación bidireccional.

- Crear un perfil de Publons generará un RID de Web of Science
- Los autores pueden corregir sus publicaciones (de la Colección Principal) en Publons y esos cambios se reflejan automáticamente en la Web of Science.

Una forma más fácil de administrar perfiles

Actualice su ORCID y las correcciones se sincronizarán automáticamente con Web of Science.

Actualice su perfil de Publons y los cambios se pueden enviar a ORCID

Actualice su ORCID y los cambios se pueden enviar a Publons.

Todo empieza con una búsqueda de autor simple, rápida e intuitiva

Una nueva búsqueda de autor rápida y eficiente guía a los usuarios con el objetivo de localizar fácilmente al autor que están buscando.

Independientemente de cuán común sea su nombre.

**Search by
Web of Science
ResearcherID or ORCID**

Su experiencia de búsqueda se ajusta automáticamente según el nivel de ambigüedad del nombre

- **Los nombres completamente únicos** le llevarán directamente al *Author Record*.
- **Los nombres moderadamente ambiguos** le llevan a una pantalla de resultados donde puede seleccionar el registro correcto o combinar registros en una vista de autor.
- **Los nombres altamente ambiguos** guiarán intuitivamente a los usuarios para refinar aún más su búsqueda (como se muestra) antes de ir a la página de resultados.

Nuestro algoritmo de desambiguación utiliza más de 40 indicadores para agrupar publicaciones probablemente creadas por la misma persona en un *Author Record*.

The screenshot displays the 'Author Search' interface on a tablet. At the top, there are navigation tabs: 'Basic Search', 'Author Search' (highlighted), 'Cited Reference Search', 'Advanced Search', and 'Structure Search'. Below these, there are sub-tabs: 'Name Search' (highlighted) and 'Web of Science ResearcherID or ORCID Search'. A descriptive text states: 'Search for an author to see their author record. An author record is a set of Web of Science Core Collection documents likely authored by the same person. You can claim and verify your author record from your author record page.'

The search form includes two input fields: 'Last name' (containing 'MUNOZ') and 'First name and middle initial(s)' (containing 'F'). A link '+ Include alternative name' is located below the first name field. Below the input fields are two dropdown menus. The left dropdown lists countries with checkboxes: PERU, PORTUGAL, SLOVAKIA, SPAIN (checked), SWITZERLAND, URUGUAY, and USA. The right dropdown lists institutions with checkboxes: ACAD GEN MIL, AGROBIOTECHNOL INST (checked), ARCH GEN SIMANCAS, AREA SANITARIA NORTE MALAGA, and ASOCIAC EDAD DORADA MENSAJEROS PAZ MURCIA. A 'Find' button is positioned to the right of the institution dropdown.
