

ELSEVIER

Seminarios Scopus

Este seminario será de 1 hora.

El viernes hay programada una sesión para preguntas sobre cualquier funcionalidad de Scopus.

Pueden enviar sus consultas a recursoscientificos@fecyt.es.

La sesión será grabada.

FECYT enviará certificado de asistencia durante los próximos días a la dirección que hayan indicado para registrarse en la sesión.

Contestar a los cuestionarios que se realizan durante la sesión es obligatorio para obtener el certificado.

Versión: Diciembre 2022

(THE) Times Higher Education World University Ranking

13 métricas agrupadas en 5 categorías:

- Teaching 30%
- Research 30%
- Citation 30%
- International outcome 7,5%
- Industry income 2%

Times Higher Education (THE)

How universities are ranked

THE uses indicators to provide comparisons across three broad areas: research, outreach, and stewardship, across all of the SDGs.

Any university that provides data on SDG 17 and at least three other SDGs is included in the overall ranking.

The methodology was developed in conjunction with THE's partners Vertigo Ventures and Elsevier, and after consultation and input from individual universities, academics, and sector groups.

Universities can submit data on as many of the SDGs as they are able. Each SDG has a series of metrics that are used to evaluate the performance of the university in that SDG.

As well as the overall ranking, THE also publishes the results of each individual SDG. This rewards any university that has participated with a ranking position, even if they are not eligible to be in the overall table.

Methodology

A university's final score in the overall table is calculated by combining its score in SDG 17 with its top three scores out of the remaining 16 SDGs. SDG 17 accounts for 22% of the overall score, while the other SDGs each carry a weight of 26%. This means that different universities are scored based on a different set of SDGs, depending on their focus.

The score from each SDG is scaled so that the highest score in each SDG in the overall calculation is 100. This is to adjust for minor differences in the scoring range in each SDG and to ensure that universities are treated equitably whichever SDGs they have provided data for. It is these scaled scores that we use to determine which SDGs a university has performed most strongly in; they may not be the SDGs in which the university is ranked highest or has scored highest based on unscaled scores

Quick guide to **7 major** ranking reports

The SDGs included:

Quacquarelli Symonds Limited (QS) World University Ranking

- Academic reputation (40%)
- Citations per faculty (20%)
- Faculty/student ratio (20%)
- Employer reputation (10%)
- International study (5%)
- International students (5%)

Todas las materias y tipos de documentos

Scopus incluye contenido de más de 7.000 editores de 105 países

- 40 idiomas
- Actualización diaria
- Diferentes tipos de documentos **peer-review** (journals, conferences, books, book series)
- 9,1 Millones de documentos en acceso abierto
- 44 Millones de patentes
- 1,4 Millones de pre-prints en los perfiles de autor

Scopus: Fuente principal para perfiles

- Tanto para autores como para instituciones, Scopus ofrece una comprensible visión de **la investigación**.
- Scopus incluye **17M** de perfiles de autor y **94.000** de institución*.
- Scopus es la única base de datos que implementa desambiguación algorítmica y sistemática para **crear y mantener perfiles completos y precisos**.
- Los autores pueden hacer cambios usando **Author Feedback Wizard**.

Scopus: Fuente principal para perfiles

Author profile generation

The **Scopus Author Identifier** uses the most powerful **algorithmic data processing** in the industry to group papers to an individual's profile with a high degree of accuracy based on matching of name, email, affiliation, subject area, citations, co-authors, etc.

The **Author Feedback Wizard** is available for Author Profile changes to be requested due to the complexities of disambiguation, such as common names, name changes, incomplete metadata from publishers, etc.
