Expanding and enhancing research discovery

New collections on the Web of Science platform

Maximize the results of limited research time with a streamlined discovery experience

Search across more than...

- 240 million records
- 3 billion cited references
- 34,950 active journals
- 254 subject categories
- 6.2 million dissertations and theses
- 2.5 million preprints
- 131 million patents for 68 million inventions
- 17.4 million data sets and studies
- 5.7 million awarded grants
- 223K policy documents

...in a single platform

All the users of the Web of Science Core Collection have free access to these 7 databases:

- Grant Index
- KCI Korean Journal Database
- Medline
- Preprint Citation Index
- ProQuest Dissertations and Thesis
- Research Commons
- SciELO Citation Index

Your institutional subscription can provide access to additional collections based on the institution specialization.

Document Type	Awarded Grant
Grant Description	Human development has posed unprecedented pressures on overall natural systems due to extraction, conversion and inefficient use of key resources, as Water, Energy and Food (WEF). Cities provide support functions to more than half of the world population, and are promoters of unsustainable use of WEF resources, acting as a negative multiplier effect along supply chains [1]. An increasing pressure to transform cities as beacons of sustainable

The epidemiology and impact of traumatic brain injury: a brief overview.

By: Langlois, Jean A; Rutland-Brown, Wesley; Wald, Marlena M

The Journal of head trauma rehabilitation

Volume: 21 **Issue:** 5 **Page:** 375-8

DOI: 10.1097/00001199-200609000-00001

Published: 2006 Sep-Oct

Document Type: Journal Article

Abstract

Traumatic brain injury (TBI) is an important public health problem in the United States and worldwide. The estimated 5.3 million Americans living with TBI-related disability face numerous challenges in their efforts to return to a full and productive life. This article presents an overview of the epidemiology and impact of TBI.

Necessity of COVID-19 Vaccination in Persons Who Have Already Had COVID-19

[N. K. Shrestha; P. C. Burke; \(...\); S. M. Gordon](#)
Apr 01 2022 | medRxiv | Total Versions: 1

Background. The purpose of this study was to evaluate the necessity of COVID-19 vaccination in persons with prior COVID-19. Methods. Employees of Cleveland Clinic working in Ohio on Dec 16, 2020, the day COVID-19 vaccination was started, were included. Anyone who tested positive for COVID-19 at least once before the study start date was considered previously infected ... [Show more](#)

Graduate students can independently publish their dissertation or thesis with ProQuest and Web of Science – FOR FREE!

The screenshot shows the ProQuest website's 'For Student Authors' page. The header includes the ProQuest logo (Part of Clarivate) and navigation links: Products & Services, Librarians, Researchers and Faculty, Dissertations, and a search icon. Below the header, there are buttons for 'Contact Us', 'Submit My Dissertation', and 'More Resources'. A large banner image with the text 'Amplify your Research' is displayed. The main content area is titled 'Why be Included?' and lists five benefits: 1. Be a part of the global research community, 2. Gain recognition of scholarly achievement, 3. Protect your intellectual property, 4. Generate income, and 5. Access discounted author products and services. A search icon is also visible in the center of the page.

Why be Included?

- Be a part of the global research community** — Increase your profile and career opportunities within your discipline and in multidisciplinary fields of study by ensuring your works are part of the conversation.
- Gain recognition of scholarly achievement** — Improve publishing opportunities through increased exposure and demonstrated usage of your work. Your dissertation will be indexed in Google Scholar and relevant subject indexes such as PsycINFO, MLA or IET Inspec to maximize your exposure.
- Protect your intellectual property** — You always retain the copyright to your work as ProQuest is a non-exclusive publisher; PQDT is also used for prior art and patent application research, strengthening your IP protection.
- Generate income** — 10% of Royalties are paid to all authors who set up an account and keep contact information current.
- Access discounted author products and services** — Receive special promotional pricing to promote your research and commemorate your accomplishments.

SciELO Scielo España es una biblioteca virtual formada por una colección de revistas científicas españolas de ciencias de la salud seleccionadas de acuerdo a unos criterios de calidad preestablecidos.

El proyecto SciELO es el resultado de la cooperación entre BIREME (Centro Latinoamericano y del Caribe de información en Ciencias de la Salud) y FAPESP (Fundação de Amparo à Pesquisa do Estado de São Paulo). En España está siendo desarrollado por la Biblioteca Nacional de Ciencias de la Salud, gracias al acuerdo de colaboración establecido en la OPS/OMS y el Instituto de Salud Carlos III

El principal objetivo del proyecto es contribuir al desarrollo de la investigación, aumentando la difusión de la producción científica nacional y mejorando y ampliando los medios de publicación y evaluación de sus resultados.

El proyecto contempla la aplicación y desarrollo de una metodología común para la preparación, almacenamiento, difusión y evaluación de la literatura científica en formato electrónico.

acerca de este sitio El objetivo del sitio es implementar una biblioteca electrónica, que proporcione acceso completo a una colección de revistas, así como al texto completo de los artículos. El acceso tanto a las revistas como a los artículos se puede realizar usando índices y formularios de búsqueda.

El sitio se actualizará tanto en forma como en contenido de forma periódica.

- Ten en cuenta que la suma de registros en cada colección es mayor que el número total de resultados. Esto se debe a que el mismo documento puede ser indexado en diferentes colecciones.
- El número total de resultados es una lista de documentos sin duplicados.

Áreas de Investigación es una clasificación compartida por todas las colecciones de Web of Science. Como resultado, puedes identificar, recuperar y analizar documentos de múltiples bases de datos que pertenecen a la misma "área de investigación".
