Sesión A2 - Buscar en Web of Science y guardar mis consultas

- Trabajar con una cuenta personal para guardar mi trabajo
- Buscar un tema con operadores booleanos
- Utilizar mi historial para guardar búsquedas y crear alertas
- Guardar mi bibliografía en listas marcadas
- Exportar una lista de publicaciones
- Personalizar mi página de inicio

Why is it still important to know how to use the advanced search?

AI Overview (Smart Search)

- **General purpose research discovery**
- Generates a summary based on a limited number of references
- What most studies show / Key highlights / Where findings differ

Deep Research of literature (Advanced Search)

- **Precise, transparent and reproducible (systematic/scoping reviews)**
- Search like an expert in your discipline (synonyms, abbreviations...)
- Complete list of references (including outliers)
- Links to the full-text for a deep dive (data, methodology, etc.)

**Smart Search helps you discover a topic.
Advanced Search helps you conduct research.**

Every research needs a librarian

“An hour in the library is worth a month in the laboratory”

Librarians may have job titles such as information specialist, research office, etc.	They can help scientists to search every relevant database to start a literature review, ensure they comply with evolving requirements to make their data or papers freely accessible, and separate the good from the bad in search results or code generated by artificial intelligence.
Literature search	• Librarians can help beginners learn the basics of conducting literature search. • Information specialists can guide users to the right databases and AI tools and make sure they get trustworthy information • Librarians can help researchers performing a high-quality literature review. This is particularly important in systematic reviews, which must follow strict methodology and are often used to inform medical practice or policy decisions.
Open Access	Librarians can help scientists to understand the actions needed to comply with Open Access requirements
Publishing	Librarians can advise in a variety of ways, from choosing between pay-to-publish open-access journals and conventional publications, to depositing papers in the right place to conform to funder mandates.
