The Web of Science™ Journal Evaluation Process and Selection Criteria

28

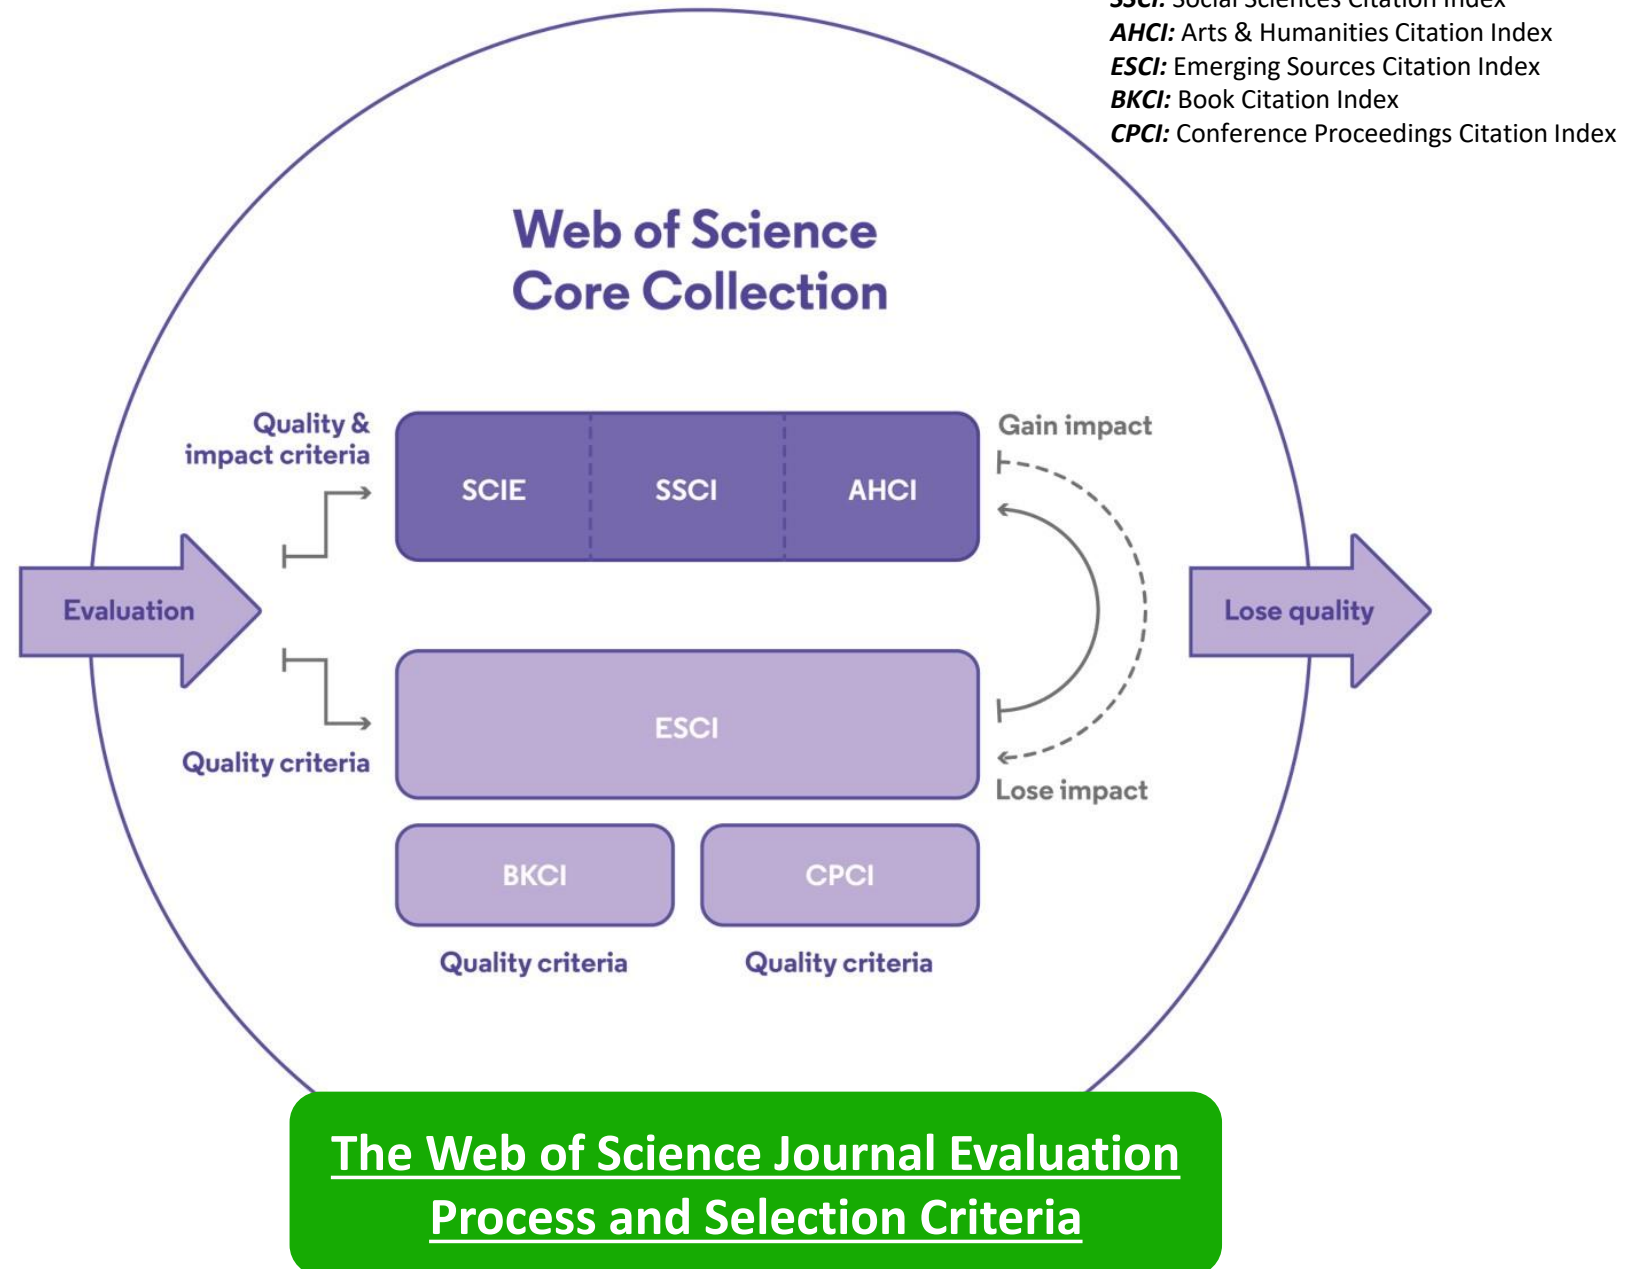

selection criteria in total

24

quality criteria to select for
editorial rigor and publishing
best practice

4

impact criteria to select for the
most impactful journals

The Web of Science™ Journal Evaluation Process and Selection Criteria

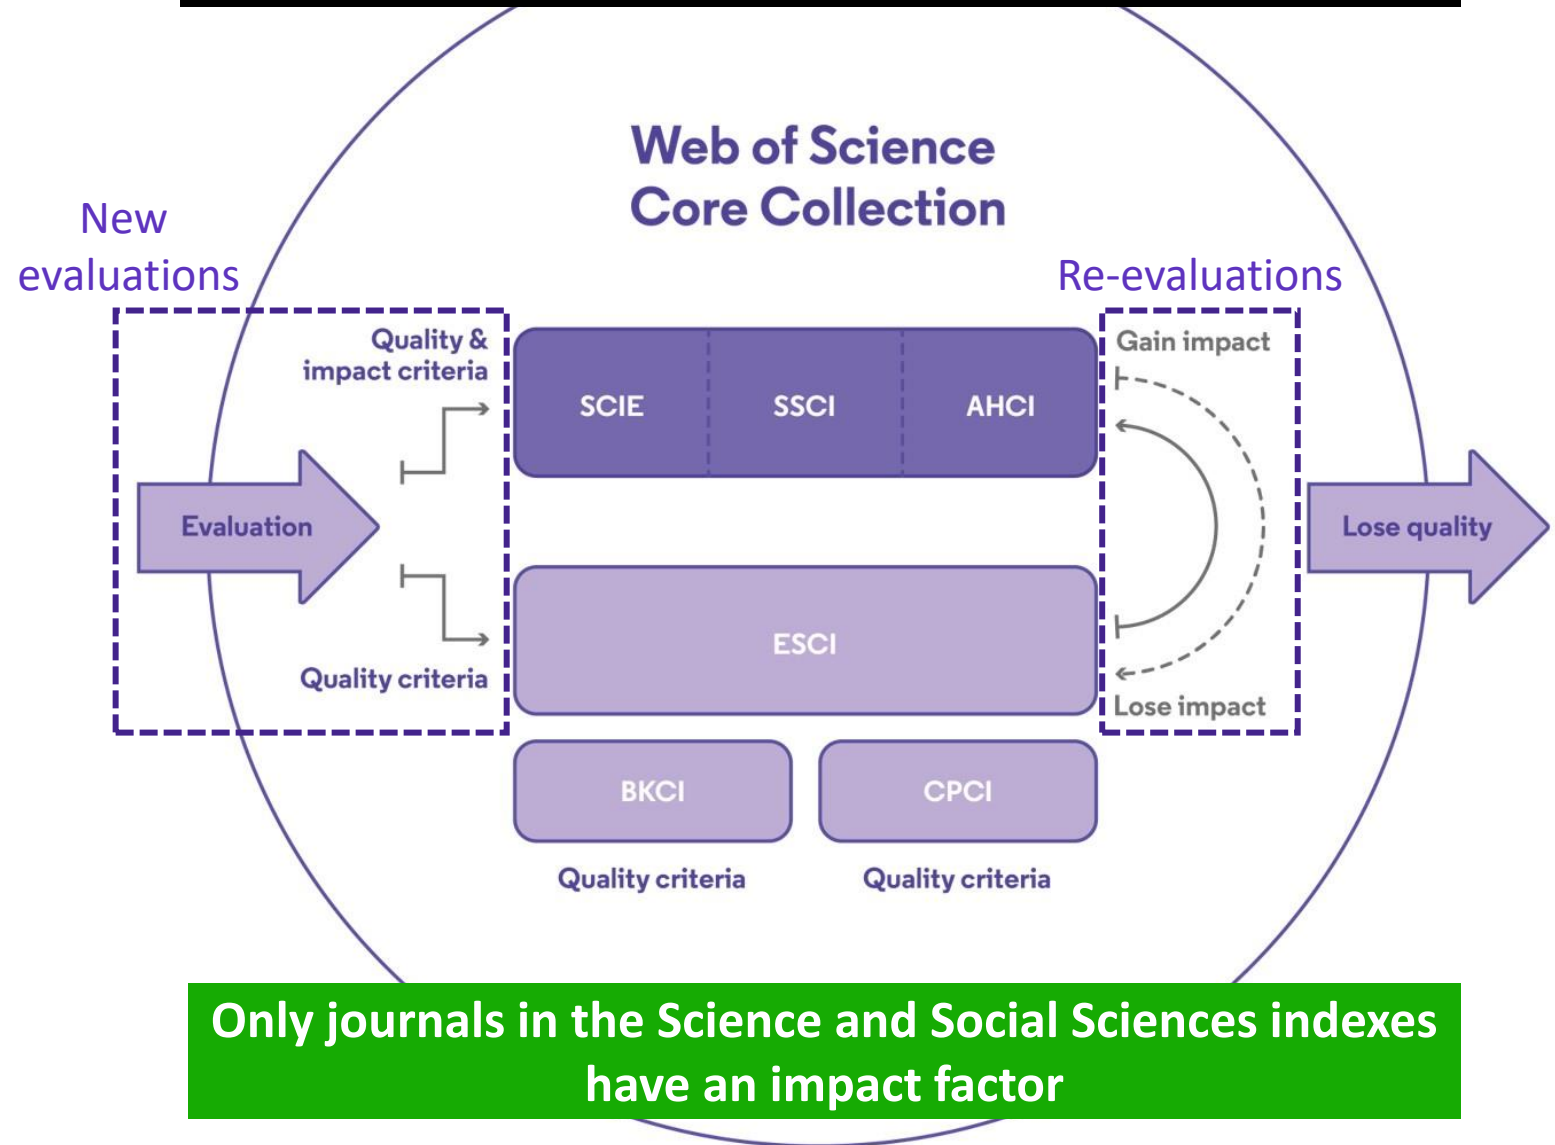

Journals that meet the quality criteria enter ESCI

Journals that meet quality **and** impact criteria enter SCIE, SSCI or AHCI

ESCI journals that gain impact move to SCIE, SSCI or AHCI

SCIE, SSCI and AHCI journals that decrease in impact move to ESCI

Any journal that fails to meet all the quality criteria will be removed from the *Web of Science Core Collection*

Protect your research reputation

Editorial integrity and publisher neutrality

Publisher neutral

Our in-house experts, who have no affiliations to publishers or research institutes, select the journals in the Core Collection to provide you with a data set of the world's leading research publications that is free of potential industry bias or conflict of interest.

In-house curation

Rigorous curation processes guard against inclusion of hijacked journals, and expert review ensures that journals are correctly classified into the appropriate subject categories so that your statistical reporting and analyses are accurate. Databases that rely on algorithmic approaches* or occasional outside review lack consistency and oversight.

Vetted OA content

Access over 16 million open access papers—including green OA— from reputable journals that have been vetted against our 28 evaluation criteria for quality and impact. Easily determine which fields are well covered by this material so that you can reserve your budget for only the most critical gaps.

- Confidently navigate the growing complexities of journal publishing.
- Make high stakes decisions about resource allocation and people with data that is independent of bias.

Web of Science Academy

Good citation behavior

Learn how to reference, where to reference, and when to reference, and gain an understanding of what citation manipulation is and how to prevent it.

This course is for authors, peer reviewers and editors.

~30 min to complete

An introduction to peer review

Learn what's expected of you as a peer reviewer, and how to respond to peer review comments as an author.

This course is aimed at early career researchers that have just started or are about to start publishing and reviewing.

~30 min to complete

Reviewing in the Sciences

Learn how to review a typical research article, what to look for in each section of a manuscript by using peer review guidelines, and how to structure your peer review report by using a template.

This course is for early career researchers that would like to learn how to peer review.

Reviewing in the Humanities

Learn how to review manuscripts such as monographs and literature reviews, what to look for in each section of a manuscript by using peer review guidelines, and how to structure your peer review report by using a template.

This course is for early career researchers that would like to learn how to peer review.

Co-reviewing with a mentor

This course is a tool to facilitate co-reviewing with your PhD or postdoc advisor. You'll complete a review by following a peer review template, then revise it together with your mentor.

This course is for published authors who would like to start reviewing for journals.

Mentoring in peer review

Help train the next generation of peer reviewers through mentoring. This short course gives you tips on the kind of mentoring and mentor feedback that is useful in peer review, and provides you with a fillable mentor feedback form.

This course is for senior researchers and academics that want to mentor early career researchers through the peer review process.

An introduction to ethical publishing behavior

Learn about ethical behavior around conducting and publishing research such as what constitutes authorship, research misconduct, declaring conflicts of interest, and identifying unconscious biases during peer review.

This course is for authors, peer reviewers and editors.

~60 min to complete

Browse, search, and explore journals indexed in the *Web of Science*

The *Master Journal List* is an invaluable tool to help you to find the right journal for your needs across multiple indices hosted on the *Web of Science* platform. Spanning all disciplines and regions, *Web of Science Core Collection* is at the heart of the *Web of Science* platform. Curated with care by an expert team of in-house editors, *Web of Science Core Collection* includes only journals that demonstrate high levels of editorial rigor and best practice. As well as the *Web of Science Core Collection*, you can search across the following specialty collections: *Biological Abstracts*, *BIOSIS Previews*, *Zoological Record*, and *Current Contents Connect*, as well as the *Chemical Information* products.

On Hold

Concerns have been raised about the quality of the content published in this journal. The journal is being re-evaluated according to our selection criteria; new content will not be indexed during the course of the re-evaluation.

When the evaluation is complete, the publisher will be informed of the outcome and the journal will either:

- be removed from coverage if it no longer meets the quality criteria
- or remain covered if it continues to meet the quality criteria.

If the journal meets the quality criteria, any missing content will be indexed. If the journal is removed from coverage, content will not be backfilled. In the most serious cases of breaches in a journal's editorial standards, as determined by our selection criteria, published content may be removed from Web of Science. Timeframes for completing a re-evaluation will depend on the particular circumstances of each case.

Process and Selection Criteria

Expand your view of the global research landscape

Emerging Sources Citation Index

Quality

Locate more trusted content from high-quality publications, especially those with open access publishing models.

Global view

Support increasing international collaboration with a discovery tool that ensures you see emerging global trends as they develop.

Inclusivity

Gain a more complete picture of institutional and researcher output, particularly early career researchers and those publishing in the social sciences and humanities.

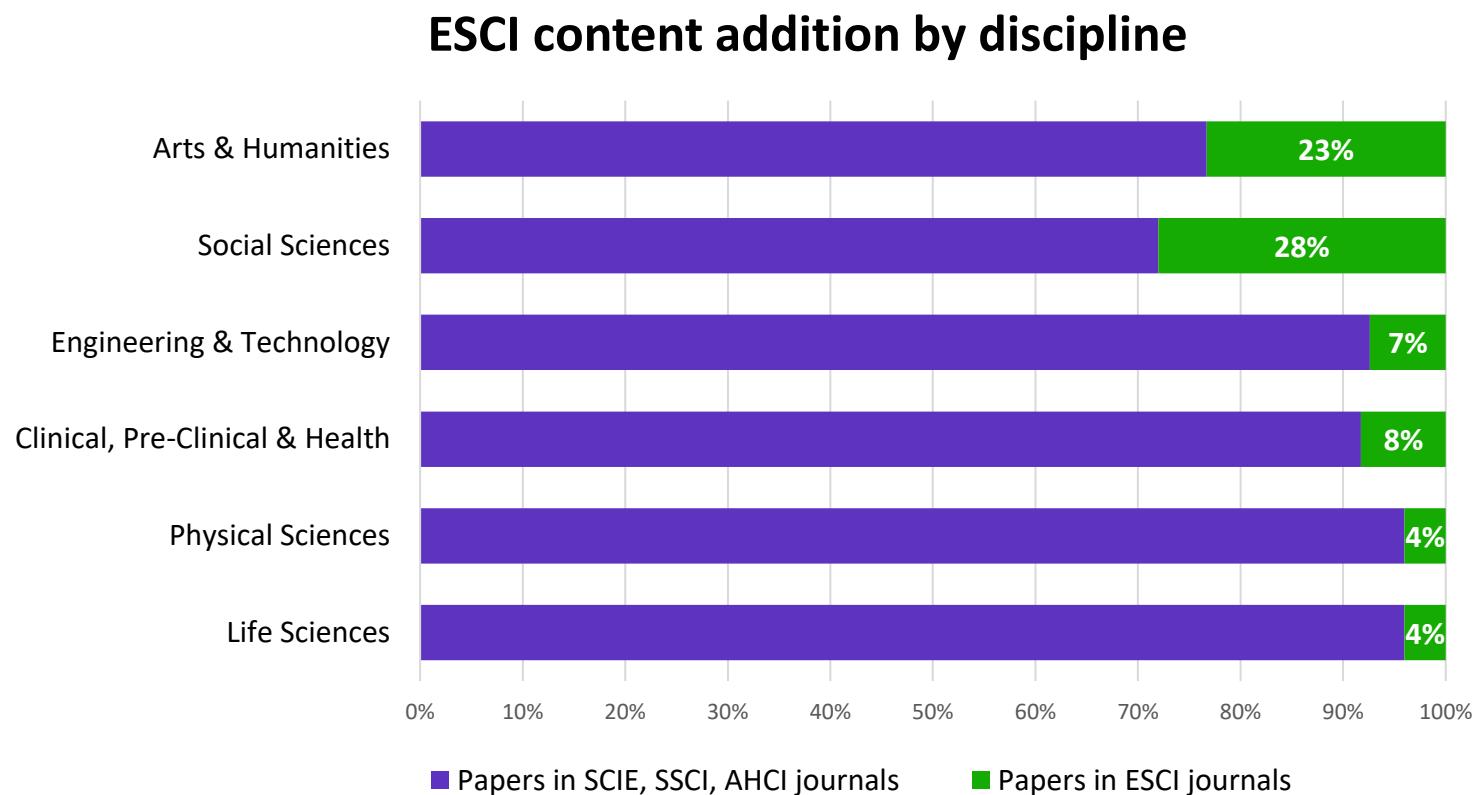

Assessment

Provide researchers with an expanded view of their research impact and personal metrics.

Support interdisciplinary research programs

Emerging Sources Citation Index

Statistics as of October 2021

- Connect more social sciences and arts & humanities research to your discovery network.
- Coverage of over 8,000 journals
