**28**  
selection criteria in total

**24**  
quality criteria to select for  
editorial rigor and publishing  
best practice

**4**  
impact criteria to select for the  
most impactful journals

**SCIE:** Science Citation Index Expanded  
**SSCI:** Social Sciences Citation Index  
**AHCI:** Arts & Humanities Citation Index  
**ESCI:** Emerging Sources Citation Index  
**BKCI:** Book Citation Index  
**CPCI:** Conference Proceedings Citation Index

# The Web of Science™ Journal Evaluation Process and Selection Criteria

Journals that meet the quality criteria enter ESCI

Journals that meet quality **and** impact criteria enter SCIE, SSCI or AHCI

ESCI journals that gain impact move to SCIE, SSCI or AHCI

SCIE, SSCI and AHCI journals that decrease in impact move to ESCI

Any journal that fails to meet all the quality criteria will be removed from the *Web of Science Core Collection*

# Protect your research reputation

Editorial integrity and publisher neutrality

## Publisher neutral

Our in-house experts, who have no affiliations to publishers or research institutes, select the journals in the Core Collection to provide you with a data set of the world's leading research publications that is free of potential industry bias or conflict of interest.

## In-house curation

Rigorous curation processes guard against inclusion of hijacked journals, and expert review ensures that journals are correctly classified into the appropriate subject categories so that your statistical reporting and analyses are accurate. Databases that rely on algorithmic approaches\* or occasional outside review lack consistency and oversight.

## Vetted OA content

Access over 16 million open access papers—including green OA—from reputable journals that have been vetted against our 28 evaluation criteria for quality and impact. Easily determine which fields are well covered by this material so that you can reserve your budget for only the most critical gaps.

- Confidently navigate the growing complexities of journal publishing.
- Make high stakes decisions about resource allocation and people with data that is independent of bias.

### Good citation behavior

Learn how to reference, where to reference, and when to reference, and gain an understanding of what citation manipulation is and how to prevent it.

This course is for authors, peer reviewers and editors.

~30 min to complete

### An introduction to peer review

Learn what's expected of you as a peer reviewer, and how to respond to peer review comments as an author.

This course is aimed at early career researchers that have just started or are about to start publishing and reviewing.

~30 min to complete

### Reviewing in the Sciences

Learn how to review a typical research article, what to look for in each section of a manuscript by using peer review guidelines, and how to structure your peer review report by using a template.

This course is for early career researchers that would like to learn how to peer review.

### Reviewing in the Humanities

Learn how to review manuscripts such as monographs and literature reviews, what to look for in each section of a manuscript by using peer review guidelines, and how to structure your peer review report by using a template.

This course is for early career researchers that would like to learn how to peer review.

### Co-reviewing with a mentor

This course is a tool to facilitate co-reviewing with your PhD or postdoc advisor. You'll complete a review by following a peer review template, then revise it together with your mentor.

This course is for published authors who would like to start reviewing for journals.

### Mentoring in peer review

Help train the next generation of peer reviewers through mentoring. This short course gives you tips on the kind of mentoring and mentor feedback that is useful in peer review, and provides you with a fillable mentor feedback form.

This course is for senior researchers and academics that want to mentor early career researchers through the peer review process.

### An introduction to ethical publishing behavior

Learn about ethical behavior around conducting and publishing research such as what constitutes authorship, research misconduct, declaring conflicts of interest, and identifying unconscious biases during peer review.

This course is for authors, peer reviewers and editors.

~60 min to complete

# How to find the right journal for your research (using actual data)

JOANNA WILKINSON  
Clarivate

Want to help your research flourish? We share tips for using publisher-neutral data and statistics to find the right journal for your research paper.

The right journal helps your research flourish. It puts you in the best position to reach a relevant and engaged audience, and can extend the impact of your paper through a high-quality publishing process.

## A few general tips:

1. Start speaking with your colleagues, supervisors and librarians
2. Explore journal suggester tools
3. Is the journal trustworthy? (Avoid “predatory publishers”)
4. Investigate journal indexing and discoverability
5. Narrow down your list getting familiar with the journal content, scope, policies, audience, etc.
6. Understand journal metrics

## More resources for editors & publishers

## Browse, search, and explore journals indexed in the *Web of Science*

The *Master Journal List* is an invaluable tool to help you to find the right journal for your needs across multiple indices hosted on the *Web of Science* platform. Spanning all disciplines and regions, *Web of Science Core Collection* is at the heart of the *Web of Science* platform. Curated with care by an expert team of in-house editors, *Web of Science Core Collection* includes only journals that demonstrate high levels of editorial rigor and best practice. As well as the *Web of Science Core Collection*, you can search across the following specialty collections: *Biological Abstracts*, *BIOSIS Previews*, *Zoological Record*, and *Current Contents Connect*, as well as the *Chemical Information* products.

# Download lists of journals

The diagram illustrates the navigation path from the Master Journal List to the Help Center, then to the Downloads section, and finally to the download options for various citation indexes.

**Master Journal List:** The top navigation bar includes the Web of Science Group logo, the "Master Journal List" button, "Search Journals", "Match Manuscript", "Downloads" (highlighted with a purple box), and "Help Center" (highlighted with a green box). A green arrow points from the Help Center button to the "Help By Topic" sidebar.

**Help By Topic Sidebar:** This sidebar contains links for "About Master Journal List", "Accounts", "Manuscript Matcher", "Journals", and "Categories & Collections (Scope Notes)".

**Collection List Downloads:** This section includes links for "Web of Science Core Collection" and "Additional Web of Science Indexes".

**Web of Science Core Collection:** Last Updated: September 20, 2021. It describes the Core Collection and its components: SCIE, SSCI, AHCI, and ESCI. A purple arrow points from this section to the "Downloads" section below.

**Downloads Section:** A purple box contains five download icons for SCIE, SSCI, AHCI, ESCI, and JCR 2021. Below the icons, a tip box provides instructions for opening and converting the downloaded CSV files.

**Additional Web of Science Indexes:** Last Updated: September 20, 2021. A purple arrow points from this section to the "Downloads" section below.

**TIP - A file ".csv" will be downloaded on your computer / Open an empty Excel spreadsheet / Select "Data" in the top menu and "From Text/CSV" to convert the .csv file into .xlsx / Select Data Type Detection = Do not detect data types (if needed)**

# On-hold Flag in the Master Journal List

Introduced to provide full transparency to Web of Science™ users.

The screenshot shows a journal profile page with the following details:

- On Hold** (with an info icon)
- Publisher: [redacted]
- ISSN / eISSN: [redacted]
- Web of Science Core Collection: [redacted]

Below the main content, there are two buttons: [Share This Journal](#) and [View profile page](#).

A modal window titled "On Hold" provides more information:

**On Hold**

Concerns have been raised about the quality of the content published in this journal. The journal is being re-evaluated according to our selection criteria; new content will not be indexed during the course of the re-evaluation.

When the evaluation is complete, the publisher will be informed of the outcome and the journal will either:

- be removed from coverage if it no longer meets the quality criteria
- or remain covered if it continues to meet the quality criteria.

If the journal meets the quality criteria, any missing content will be indexed. If the journal is removed from coverage, content will not be backfilled. In the most serious cases of breaches in a journal's editorial standards, as determined by our selection criteria, published content may be removed from Web of Science. Timeframes for completing a re-evaluation will depend on the particular circumstances of each case.
