Science*

The *Web of Science Core Collection*

Índices

Sólo las revistas de los índices de ciencias y ciencias sociales tienen un factor de impacto

1. Science Citation Index Expanded (**SCIE**)
Creado en 1964 como SCI en la actualidad indexa revistas con datos retrospectivos desde 1900 hasta el momento presente con referencias citadas completas.
2. Social Sciences Citation Index (**SSCI**)
Creado en 1973 en la actualidad indexa revistas con datos retrospectivos desde 1900 hasta el momento presente con referencias citadas completas.
3. Arts & Humanities Citation Index (**AHCI**)
Creado en 1978, en la actualidad indexa revistas con datos retrospectivos desde 1975 hasta el momento presente con referencias citadas completas.
4. Emerging Sources Citation Index (**ESCI**)
Creado en 2015 en la actualidad indexa revistas con datos retrospectivos desde 2005 hasta el momento presente con referencias citadas completas.
5. Conference Proceedings Citation Index (**CPCI**)
Creado en 2008 en la actualidad indexa actas de conferencias desde 1990 hasta el momento presente con referencias citadas completas.
6. Book Citation Index (**BKCI**)
Creada en 2011 en la actualidad indexa libros.

Las categorías de la Web of Science

https://images.webofknowledge.com/WOKRS533JR18/help/es_LA/WOS/hp_subject_category_terms_tasca.html

254 categorías

Contenido | Índice | Cerrar ayuda

Colección principal de Web of Science Ayuda

Todos los libros y revistas incluidos en la colección principal de *Web of Science* se asignan al menos a una de las siguientes categorías de materias. Cada registro de la colección principal de *Web of Science* incluye la categoría de materia de su publicación fuente en el campo **Categorías de Web of Science**.

Acoustics (Acústica)	Electrochemistry (Electroquímica)	Literature (Literatura)	Physics, Fluids & Plasmas (Física, Fluidos y Plasmas)
Agricultural Economics & Policy (Política y Economía Agrícola)	Emergency Medicine (Medicina de Emergencia)	Literature, African, Australian, Canadian (Literatura, Africana, Australiana, Canadiense)	Physics, Mathematical (Física, Matemática)
Agricultural Engineering (Ingeniería Agrícola)	Endocrinology & Metabolism (Endocrinología y Metabolismo)	Literature, American (Literatura, Americana)	Physics, Multidisciplinary (Física, Multidisciplinar)
Agriculture, Dairy & Animal Science (Ciencia de los Animales, Productos Lácteos y Agricultura)	Energy & Fuels (Energía y Combustibles)	Literature, British Isles (Literatura, Islas Británicas)	Physics, Nuclear (Física, Nuclear)

Categorías de Web of Science - Notas de Alcance

- [Science Citation Index Expanded - Notas de ámbito \(SCIE\)](#)
- [Social Science Citation Index - Notas de ámbito \(SSCI\)](#)
- [Arts & Humanities Citation Index - Notas de ámbito \(AHCI\)](#)

Página de resultados - Refinar resultados

En la página de resultados, puede refinar aún más los resultados de su búsqueda seleccionando términos de categorías específicas que aparecen en la lista Categorías de Web of Science del panel de la izquierda.

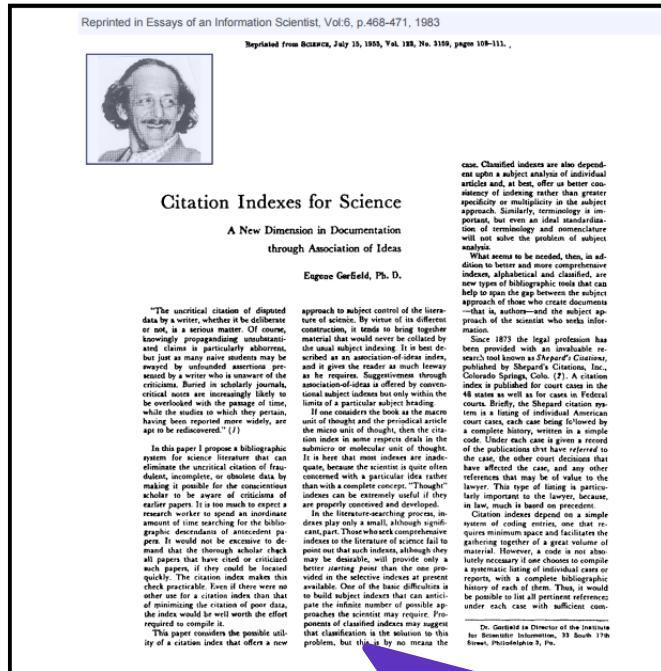

Opción de análisis de resultados

En la página Analizar resultados, puede agrupar y clasificar registros de un conjunto de registros seleccionando la opción Categorías de Web of Science. Use esta función para ver una clasificación por campo, número de registros y porcentaje de cada categoría de Web of Science del conjunto de resultados.

La invención del factor de impacto

- En 1963, Eugene Garfield crea Science Citation Index, ISI, Philadelphia
- Eugene desarrolla el concepto del Índice de Citas
- SCI se convierte en un producto comercial

1

**The Agony and the Ecstasy—
The History and Meaning of the Journal Impact Factor**

Presented by

Eugene Garfield
Chairman Emeritus, Thomson ISI

Chicago, September 16, 2005

- El factor de impacto se desarrolló para ayudar a seleccionar las revistas de SCI
- Eugene Garfield co-inventó el JIF
- Está disponible desde 1975

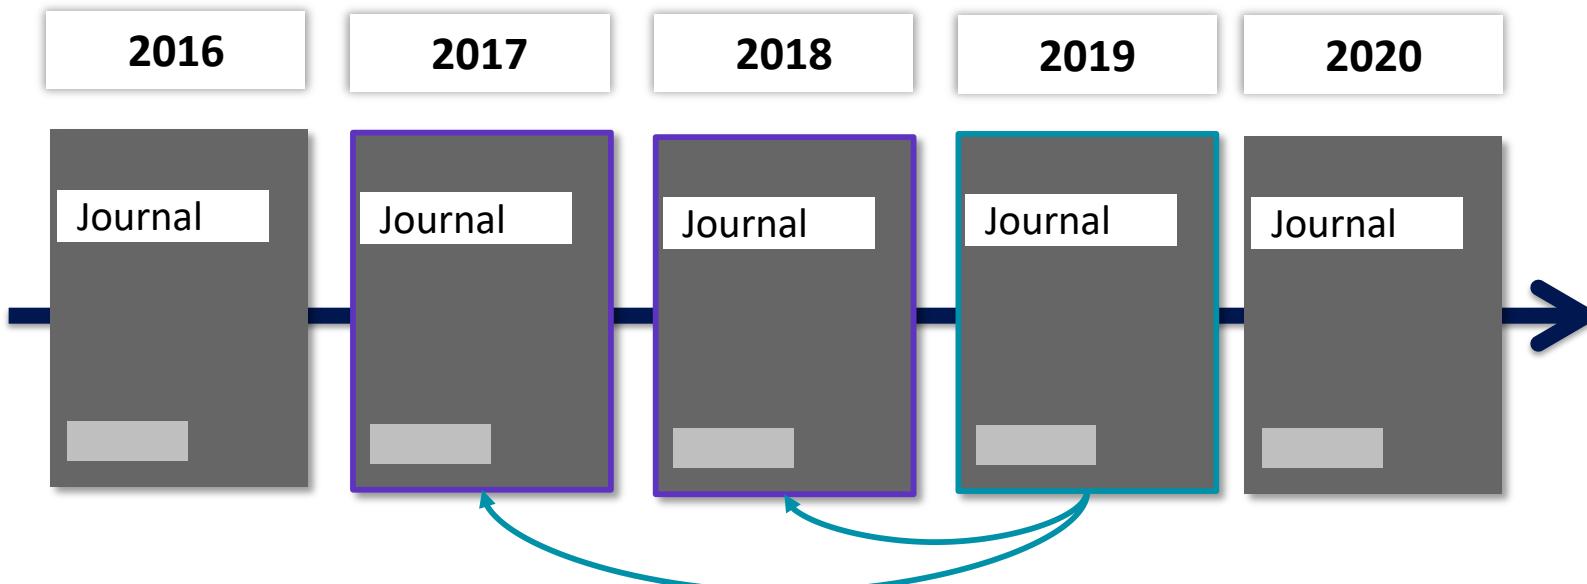

I had considered as an alternative to and Paranoia of Citations and Impact Factors."

Origins of the Impact Factor

I first mentioned the idea of an index of citations in 1953. I had been considering the primordial reference for the concept of "impact factor" for some time. Four years later, we began the experimental *Genetics Citation Index*. In 1957, we began the *Journal Impact Factor*. In 1958, we published the *1961 Science Citation Index*. In 1955, it did not occur to me that the "factor of impact" would one day become so controversial. Like nuclear energy, the factor of impact was a mixed blessing. I expected it to be used constructively while recognizing that in the wrong hands it might be abused. Since *Current Contents*, no less *SCI*, did not exist, it would have been precocious indeed to contemplate the influence of the nascent impact factor.

In the early 1960s, Irving H. Sher and I created the journal impact factor to help select journals for the new *Science Citation Index (SCI)*. To do this we simply re-sorted the author citation index into the journal citation index. From this simple exercise, we learned that initially a core group of large and highly cited journals needed to be covered in the new *SCI*.

¿Cómo se calcula el factor de impacto?

Learn more: [JCR Best Practices](#)

2019 Journal Impact Factor

Ratio of
citations from 2019 to papers
published in 2017 and 2018
to
papers published in 2017 and 2018

Journal Impact Factor Calculation

$$2019 \text{ Journal Impact Factor} = \frac{496}{14} = 35.429$$

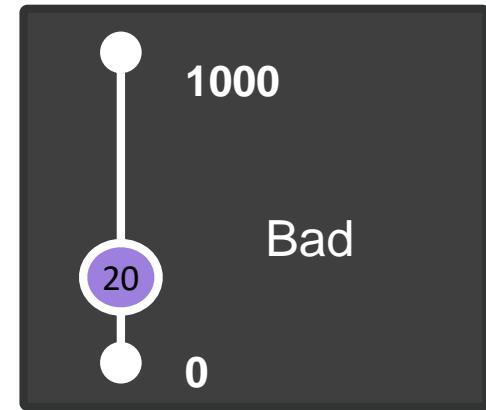

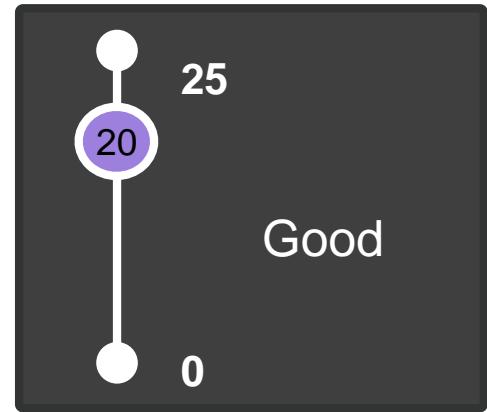

How is Journal Impact Factor Calculated?

$$\text{JIF} = \frac{\text{Citations in 2019 to items published in 2017 (163) + 2018 (333)}}{\text{Number of citable items in 2017 (6) + 2018 (8)}} = \frac{496}{14}$$

Context is everything

El total de citas de esta publicación es alto o es bajo?

20
good or bad?

Depende del contexto (área de investigación, año de publicación...)

Entender los percentiles y los cuartiles

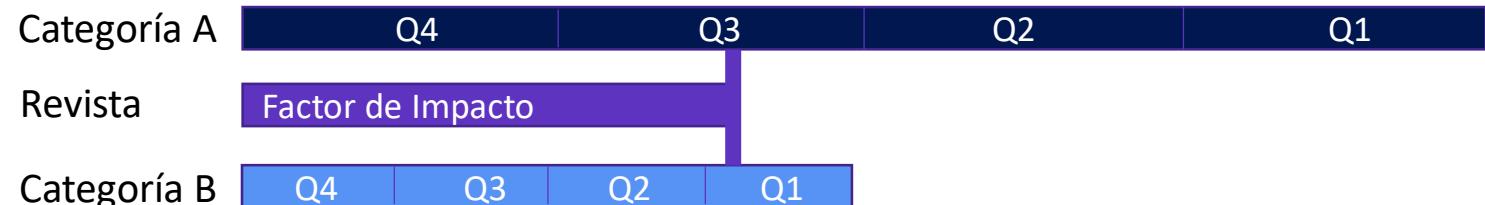

El percentil de una revista determina el ranking de esta revista
en una categoría de la Web of Science

	Full Journal Title	Total Cites	Journal Impact Factor	Average JIF Percentile
1	Annual Review of Marine Science	3,870	15.225	98.998
2	Oceanography and Marine Biology	2,485	6.286	98.169
3	LIMNOLOGY AND OCEANOGRAPHY	29,814	4.325	96.916
4	OCEANOGRAPHY	3,813	3.913	94.697
5	JOURNAL OF PHYSICAL OCEANOGRAPHY	14,963	3.389	93.182

La revista con el FI más alto
en una categoría determinada
es la que tiene el percentil más alto

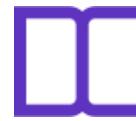

Quartiles	Percentiles
Q1	> 75%
Q2	50-75%
Q3	25-50%
Q4	< 25%

Una revista puede estar indexada en dos categorías diferentes y tener un percentil y cuartil diferente en cada una de ellas.

How is open access content displayed in Journal Citation Reports?

Gold OA Citable*

Papers tagged as either **DOAJ Gold** or **Other Gold** in Web of Science are counted as Gold OA Citable in JCR.

Subscription and free to read •

Papers identified as **Bronze**, **Green Published** and **Green Accepted** in Web of Science are counted as part of the Subscription and Free to Read Citable content in JCR.

Citable items

All materials indexed as articles or reviews in Web of Science and counted as Citable Items in the denominator of the JIF.

Other

Incidental items, such as editorial material, correspondence, news, meeting abstracts, that are not counted in the JIF denominator.

Unlinked

Citations to a journal that have incomplete data at the paper level, but are still included in the JIF calculation.

The screenshot shows the top navigation bar of the InCites Journal Citation Reports website. It includes links for Web of Science, InCites, Journal Citation Reports, Essential Science Indicators, EndNote, and Publons. On the right side, there is a user account section with an email address (anne.delgado@clarivate.com), a Help link, and an English language dropdown. Below the navigation bar, the page title 'InCites Journal Citation Reports' is displayed.

The screenshot displays the main content area of the help page. On the left, a sidebar contains a list of topics such as 'What's New', 'Getting Started', 'Database Updates', 'Scope Notes', etc. The main content area features four large, rounded rectangular cards with icons and text: 'What's New' (clock icon), 'Getting Started' (person icon), 'Training Videos' (play button icon), and 'Glossary' (book icon). Below these cards, a section titled 'About Journal Citation Reports' provides a brief description of the service's purpose and scope.

About Journal Citation Reports

Journal Citation Reports aggregates the meaningful connections of citations created by the research community through the delivery of a rich array of publisher-independent data, metrics and analysis of the world's most impactful journals included in the Science Citation Index Expanded (SCIE) and Social Sciences Citation Index (SSCI), part of the Web of Science Core Collection.

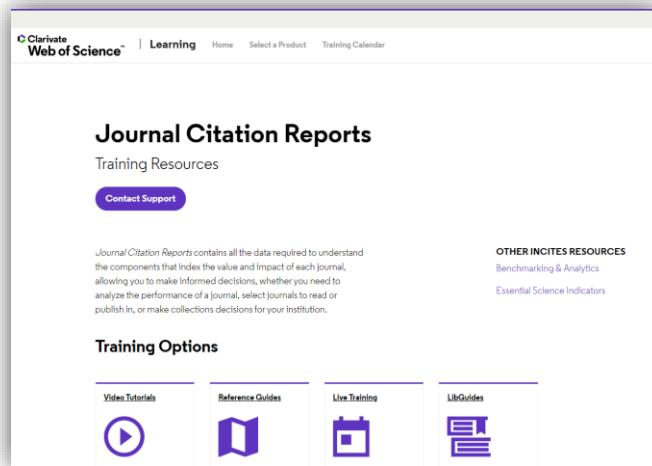

Journal Citation Reports is the only journal report of its kind that is both complete and editorially selective; it contains all the data required to understand the components that index the value and impact of each journal. The structured data are curated by a global team of experts who continuously evaluate and select the collections of journals, books and conference proceedings covered in the Web of Science Core Collection to ensure accuracy in evaluating journal impact.
