¿Cómo funciona?

- Las adiciones automáticas solo funcionan en perfiles que ya contienen al menos una publicación de Core Collection (el algoritmo de coincidencia se basa en los metadatos de estos artículos)
- Solo las publicaciones de Core Collection (y del índice de preprints) se agregan automáticamente a los perfiles reclamados y no reclamados
- Para los perfiles reclamados, las publicaciones agregadas automáticamente se consideran reclamaciones, no sugerencias (queremos ahorrar tiempo y trabajo a los usuarios sobre la base de que el algoritmo obtendrá en gran medida las adiciones correctas)
- Las adiciones automáticas a un perfil no son instantáneas (pueden pasar unos días antes de que un documento se agregue automáticamente a un perfil después de que se indexe)

Se le informará por correo electrónico cuando se agreguen nuevas publicaciones a su perfil reclamado
